

This is my first Latex Document.

Suppose we are given a rectangle with side lengths $x + 1$ and $x + 3$. Then the equation $A = x^2 + 4 * x + 2$ represents the area of rectangle.

Suppose we are given a rectangle with side lengths $x + 1$ and $x + 3$. Then the equation

$$A = x^2 + 4 * x + 2$$

represents the area of rectangle.
